**Together, we've got this.**

*Personalized Home Care that promises peace of mind for families and their loved ones.*

## Better care for better quality of life.

We address 5 areas of care needs so you and your loved one get complete peace of mind.

Most care plans only address basic care needs. Better quality of life is only achieved when all of an individual's requirements are met. That's why our 360° Approach addresses 5 areas of care. It covers everything from bathing and helping someone get dressed to coordinating services with healthcare partners. We even provide family and emotional support.

### Your dedicated guide for better care.

Our Care Experts are experienced care professionals with roots in your community. They know their way around our complex healthcare system and what great care looks like. But more than that, they are there every step of the way, so they can step in during a crisis, advocate for you and deliver the best care possible.

### Your personalized 360° Care Plan.

We ask a lot of questions before we develop your personalized 360° Care Plan. That's because we

want to understand exactly what you need, and what your goals are. Then we create a personalized plan that takes care of everything, the way you want it taken care of. As your needs and goals change, so does your Care Plan.

### We take a team approach. One that includes you.

We'll custom match you with a caregiver that suits your culture, personality, and lifestyle. This caregiver works with your entire care team, including your Care Expert, medical professionals and your own family, to ensure everything is taken care of, any time of day or night. Need someone to prepare a meal or ensure the transition home from the hospital is smooth and safe? We're here to help, in any way we can.

### Above and beyond standard care.

Our ultimate goal is to do everything we can to help your loved one live the best life possible. Quality health care and physical care are a big part of that, but there's so much more. We want to ensure our clients have more better days and find the joy in the little things. It may be something as simple as visiting a favorite hairdresser, going shopping, or rediscovering an old hobby. These are the moments that really matter. And they can be just as important as everything else we do for you.

### Your care. Your way.

Whether you need a few hours a week or 24/7 care, we provide everything you need in the comfort of your home, wherever that home is. Our services include:

- Bathing, dressing and toileting
- Meal preparation
- Light housekeeping and laundry
- Companionship
- Pre/post-operative care (e.g. joint replacement/ cardiac surgery)
- Stroke/Brain Injury care
- Alzheimer's and Dementia care
- Hospital to home transition
- Medication reminders
- Palliative care
- Health system navigation and client advocacy

### A team of carefully selected experts.

Our Care Experts carefully select and match clients with an extended team of professionals as needed.

They include: Registered Nurses, Dietitians, Physiotherapists, Acupuncturists, Occupational Therapists, Speech Therapists and Massage Therapists.

We offer around the clock care, comfort and safety for clients that ensures total peace of mind for everyone at home.
