## LACE AUDITORY TRAINING PROGRAM

Listening and Communication Enhancement (LACE) is a

computerized training program designed for home use. Just as physical therapy helps you rebuild muscles and adjust movements to compensate for physical weakness or injury, LACE assists in developing listening skills and strategies that enable you to increase your ability to understand speech in noisy environments **by up to 40%**, as well as improve a host of other communication skills. The training program is extremely affordable, and you can complete training in 20 days! Please visit [www.haltonhearing.com](http://www.haltonhearing.com) to learn more!
